DETAILED ACTION

1. The Amendment and arguments of 8/9/06 have been considered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 7, 11, 14, 15, 16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The phrase "substantially simultaneously" is not supported by the specification.

3. Claim 3 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The phrase "stamps includes a date by which an item bearing said postage meter stamp must be posted" is not supported by the specification.

4. Claim 4 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in

Art Unit: 3628

the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The phrase "stamps includes a location from which an item bearing said postage meter stamp is to be posted" is not supported by the specification.

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Block (6,010,156).

As per Claim 1.

Block ('156) discloses:

a general purpose processor based system, see figure 2, having a postage printing application program thereon, see column 2, lines 31-35;

a general purpose printer coupled to the general purpose processor based system, see (214);

a sheet having a plurality of transfer sections thereon, wherein said postage printing application controls said general purpose processor based system and said general purpose printer to print a plurality of postage meter stamps on said sheet, see figure 1; and

a postage storage device coupled to said general purpose processor based system having postage value credit stored therein, wherein said general purpose processor based system retrieves an amount of postage from said postage storage device for printing as a postage meter stamp of said plurality of postage meter stamps,

Art Unit: 3628

wherein said postage storage device comprises an expansion card coupled to said host processor based system, see column 4, lines 30-42.

As per Claim 2.

Block ('156) further discloses a first postage meter stamp of said plurality of postage meter stamps is printed on a first transfer section of said plurality of transfer sections and said second postage meter stamp of said plurality of postage meter stamps is printed on a second transfer section of said plurality of transfer sections, see figure 1.

As per Claim 3.

Block ('156) further discloses a first postage meter stamp includes a date, see figure 4A (317).

As per Claim 4.

Block ('156) further discloses a first postage meter stamp includes a location from which it is to be posted, see figure 4A (317).

As per Claim 5.

Block ('156) further discloses a first postage meter stamp includes a sender's ZIP code, see figure 4A (317).

As per Claim 6.

Block ('156) further discloses a first postage meter stamp includes a recipient's ZIP code, see figure 4A (315).

Allowable Subject Matter

6. Claims 7,11,14,15,16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
